Our Vision

We envision Smart Routing System (SRS) as a prominent leader in Crowd Control and Security Information Services in Nigeria and Africa.

We are commited to delivering high-quality services with utmost efficiency and effectiveness while minimizing cost.

Mission Statement And Core Values

Our primary mission is to prioritize client satisfaction through the efficient and effective delivery of services to specified requirements.

Our team, comprised of well-trained, dedicated, committed, and target-driven professionals, is ready to overcome any challenges in our pursuit of excellence.

“Quality and customer satisfaction are the cornerstones of our existence”

Our Position

We stand firm on the principles of high-quality delivery and customer satisfaction.

Our operational base is solid and guaranteed, backed by a proven track record that has kept us at the forefront of the market.

Who Are We?

Smart Routing System (SRS) is a registered business organization in Nigeria with the Corporate Affairs Commission (RC No. 3325108).

Specializing in Crowd Control and Security Information Management System, we have gained global recognition for our outstanding track record, including being listed among the top ten Identification solution providers worldwide.

Our Head Office is located at No.3 God Grace Estate, Flat 8, Off Water Works Road, Rumuola, Port Harcourt, with a branch in Benue State.

Having previously operated in Ghana, we have expanded to Nigeria to further address security challenges. SRS is deeply committed to providing high-quality security services to tackle current security issues.

Product
& Services

Development of App: SRS excels in developing customized apps based on specific requests. We have designed numerous apps for security tracking systems, addressing security and kidnapping challenges in various states in Nigeria.

Our capabilities extend to location and environmental security surveillance services, efficient crowd control, and the development of tracking systems tailored to diverse organizational needs (such as human control, complex employee labour management system, movement of person or object in any form).

Our Organizational Structure

We boast a well-structured and organized Management System ensuring timely project completion and service delivery.

Our leadership includes two Directors: Director of Project and Director of Finance and Admin.

We have well-equip safety unit, managed by a certified safety professionals with vast experience in Technology and Information Management System.

Our QA/QC- Quality Assurance and Quality Control unit are topnotch in ensuring IT Compliance, which is very important in product. Delivering to specification devoid of defect is our key interest.

Our Internal Control unit always ensures strict compliance to organizational policy and regulations. Our inventory control management is of modern and standard given the global realities in security and information management challenges.

In view of all, we have no doubt of timely delivering to specification of any project
