About SRS

Smart Routing is a pioneering security-focused software company dedicated to delivering innovative security solutions tailored for the educational sector. Our unwavering commitment to prioritizing

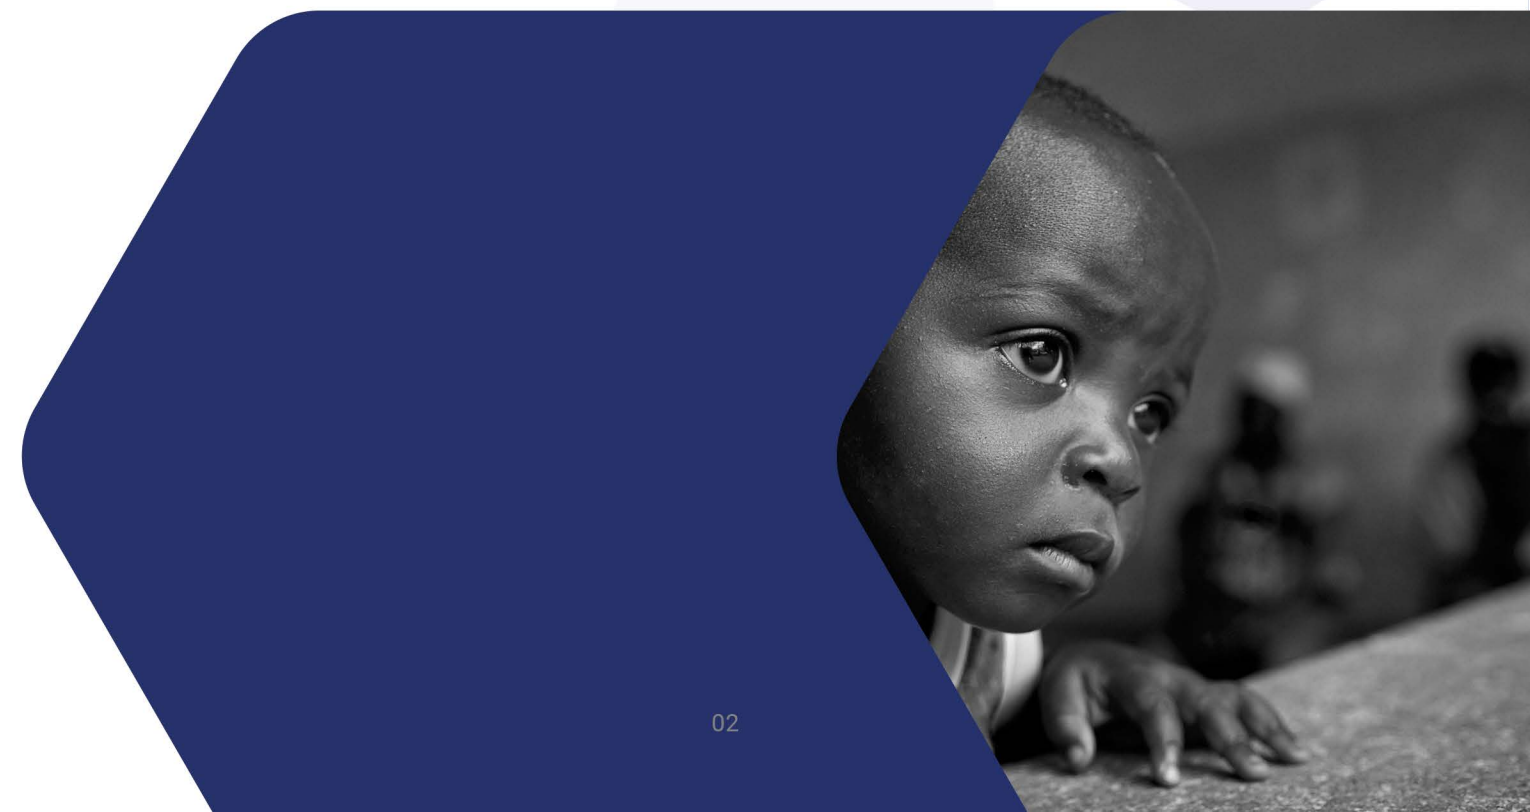

student safety, fostering secure learning environments, and upholding privacy has positioned us as industry leaders. Our practical, easy-to-implement innovations are designed for effective protection, backed by a team of technology professionals with extensive experience in managing and implementing security system initiatives.

THE CHALLENGE: SAFETY IN EDUCATIONAL INSTITUTIONS

In today's landscape, the safety and security of educational institutions are confronted with unprecedented challenges. Threats from kidnappers, potential intruders, and terrorists have rendered schools, once considered safe havens for learning, more vulnerable. Manual verification processes for visitors or guardians often prove error-prone and ineffective, leaving schools exposed to unauthorized access and potential security risks.

The process of ensuring the safety of students during pick-up and drop-off is fraught with challenges, including the risk of unauthorized individuals attempting student pick-up, particularly in areas with security concerns. Traditional methods of tracking student and staff attendance result in cumbersome processes, leading to issues like ghost students, inaccurate records, and delayed emergency responses.

SRS's INNOVATIVE SOLUTION

SCHOOL SECURITY SYSTEM

Recognizing the diverse financial landscapes of educational institutions, Smart Routing System has ingeniously developed the School Security System.

This revolutionary system allows parents to assign authorized individuals to pick up their children. Upon scanning fingerprints, these designated individuals are promptly identified and granted access to pick up the child. After the pickup is completed, parents receive SMS alerts, further enhancing security protocols.

By attaching meticulously printed barcodes to students' uniforms or ID cards, this solution enables seamless tracking of students upon arrival and departure, with immediate SMS notifications sent to parents, ensuring real-time insights into their child's movements.

KEY FEATURES

- Arrival and Departure Monitoring for Students.
- Authorized Personnel Recognition for Pick-Up.
- Staff Attendance Monitoring System.

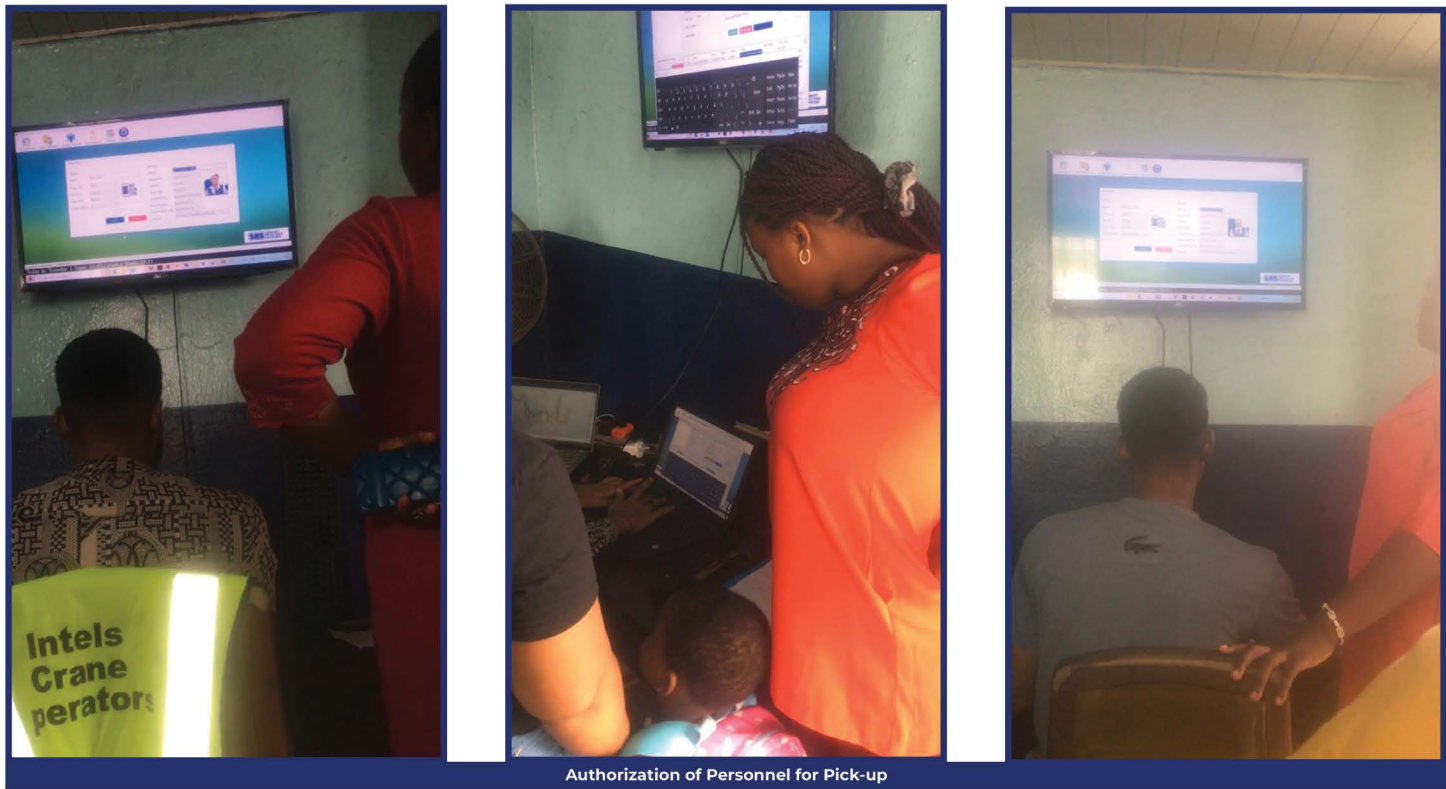

BENEFITS OF USING FINGERPRINT & BARCODE TECHNOLOGY FOR PARENTS AND GUARDIANS

- Barcode technology provides parents and guardians with real-time information about their children.
- Fingerprint technology enables parents to assign authorized individuals for picking up their kids from school, with SMS notifications upon successful pickup.
- Receive SMS notifications when your child arrives at and departs from the school premises.
- Improves child safety by enhancing security through fingerprint technology, identifying unauthorized visitors or pickers.

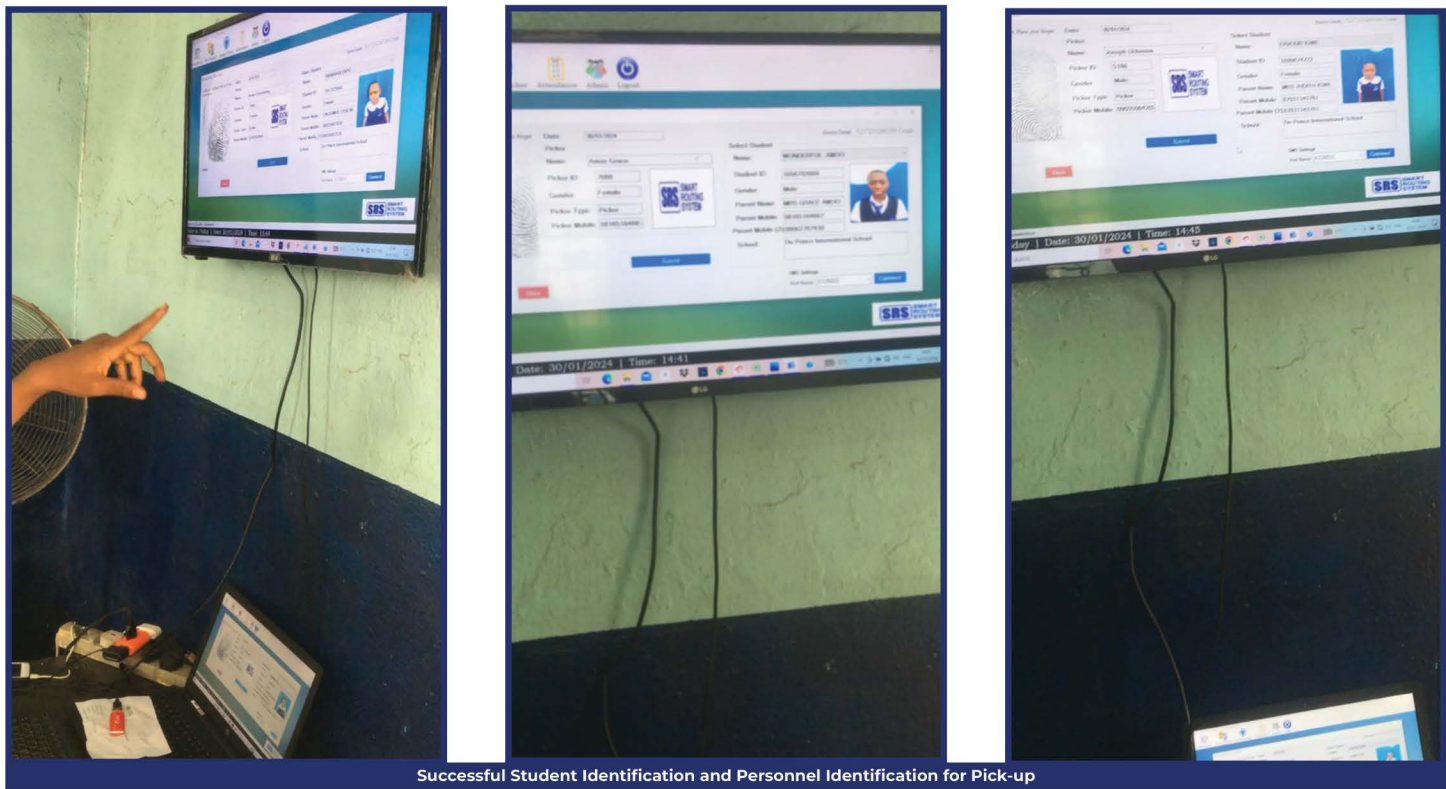

BENEFITS OF USING FINGERPRINT & BARCODE TECHNOLOGY FOR SCHOOL MANAGEMENT

- Tracking equipment and assets are streamlined with each student wearing a barcode ID, facilitating recording of their entry and exit from the building.
- Simplified student attendance recording through a single scan for each student, eliminating the need for manual entry.
- Organizing school libraries is made efficient with a barcode scanning system, allowing faster and accurate check-in and check-out of books.
- Ensures student safety by using a fingerprint scanner to identify parents and authorized pickers in real-time, with SMS notifications sent to parents upon their kids being picked up.
